Building scalable SaaS and eCommerce platforms with Laravel, React, and DevOps automation.

PROFILE

Results-driven Full Stack & DevOps Engineer with 7+ years of experience designing, building, and scaling SaaS, eCommerce, and workflow automation platforms. Expert in Laravel, React, Vue, Docker, and AWS, with a strong record of implementing high-performance systems, automation pipelines, and clean, maintainable architecture. Proven success in transforming legacy systems into reliable, cloud-ready, multi-tenant SaaS applications.

WORK EXPERIENCE

Full Stack & DevOps Engineer | Paxform (Remote, Australia) — 03/2025 – Present

- Built a plan- and feature-based ACL (Access Control List) to manage module and feature access by subscription tiers.
- Integrated a custom Email Template Builder using GrapesJS, allowing drag-and-drop design and automated delivery workflows.
- Implemented Custom Domain, Custom Database, and Custom Storage (S3/DigitalOcean Spaces) with automated SSL provisioning, enabling secure, isolated environments per tenant.
- Redesigned the Form Builder UI using React + Ant Design, improving usability and modularity.
- Developed dynamic conditional logic (branching, calculator logic, show/hide) for adaptive forms.
- Created a Workflow & Task Management System using Laravel + React with multi-stage flows and role-based actions.
- Migrated to a monorepo architecture, Dockerized the platform, and set up CI/CD pipelines for zero-downtime deployments.
- Optimized backend and caching strategies, improving API performance by 35% and platform scalability.

Senior Full Stack & DevOps Engineer | DoviLearn.com (Remote, Nigeria) — 06/2024 – 03/2025

- Rebuilt a broken LMS into a scalable SaaS platform (BulletLMS.com) using Laravel + Vue.js.
- Automated deployments and backups via GitHub Actions and DigitalOcean, reducing manual errors by 80%.
- Refactored APIs and optimized server configurations, improving performance and uptime by 45%.
- Integrated Paystack, Flutterwave, and Stripe for seamless international payments.
- Migrated infrastructure to a new server with improved reliability and response times.

Full Stack Engineer | The Coding Machine (Remote, France) — 04/2019 – 05/2024

- Built and optimized backend APIs using Laravel, Symfony, and Node.js, improving speed by 30%.
- Reduced production error rates by 25% through debugging, monitoring, and backend optimization.
- Supported Dockerized and AWS-based infrastructure for distributed enterprise projects.

EDUCATION

Bachelor of Technology – Mathematics & Computer Science

Federal University of Technology, Owerri (FUTO), Nigeria | 2006 – 2011

CERTIFICATIONS

Scrum Master Certified (SMC)

SKILLS

Frontend: React.js, Vue.js, Next.js, React Native, Ant Design, TailwindCSS

Backend: PHP (Laravel, Symfony), Node.js, Python

DevOps & Cloud: Docker, GitHub Actions, AWS (EC2, S3, Lambda), DigitalOcean, Redis, Nginx, SSL Automation

Databases: MySQL, PostgreSQL

Other: Monorepo Architecture, REST APIs, CI/CD, SaaS Scaling, Multi-Tenant Systems, Clean Architecture

LANGUAGES

English: Full Professional Proficiency

French: Elementary Proficiency
